

# CASE

## CHRONIC RENAL FAILURE

A 5 year old boy R/o Boondi (Rajasthan, India), only child of the parents, suffering from Chronic renal failure. Child underwent prolonged dialysis.

Mother – Hysterectomy was done due to a large uterine fibroid.

### **INVESTIGATIONS**

Congestive hepatomegaly. Bilateral medical renal disease, Bilateral pleural effusion, ascites

One day blood pressure shoots up.

Child completely unconsciousness admitted in Intensive care unit.

Sudden screams, Chewing motion, picking of lips. Bilateral pleural effusion. Congestive Hepatomegaly. Involuntary motion of one arm and leg. General Dropsy Shivering on uncovering.

Blood urea-326 mg%

S creatinine- 3.20 mg%,

S sodium-129 meql ,

S potassium-3 meql .

Albumin-4 +++++,

Pus Cell- 2-3 hpf ,

Rbc cell -220 – 250 hpf ,

**BP -220/130mm/Hg**

**One can imagine a BP220/130 in a 5 year old child**

Nephrologist ,intensivist,cardiologist,paediatrician tried all means but failed.

Homoeopathy was given a chance. Infact this was a telephonic case taking and a telephonic prescription later on

### **Homoeopathy in Intensive care unit**

HELLEBORUS 200 single dose sublingually was administered

Semi consciousness returned in few minutes. Horrible smell from mouth lessened, picking of lips stopped. Involuntary motion of one arm & leg stopped.

Pleural effusion better. General dropsy lessened

### **Homoeopathy leading the team of Doctors**

HELLEBOROUS 200 repeated.

Fully conscious. Smile (dull) appeared on face.

Urinary output much better.

Blood urea-266.5 mg%.S.creatinine -3.30 mg%.Blood pressure 140/90 mm/Hg

### **Modern experts advised to continue Homoeopathy**

#### **INVESTGATION DURING TREATMENT**

Blood urea-104, S creatinine 1.1

Sudden flushes of heat started. Swelling on upper part of eye lid. Flushes of heat from face, eyes and head > eating. Abdominal colic. Constipation.

Aegle Folia Q 5-5 drops twice daily was prescribed

#### **INVESTIGATION AFTER TREATMENT**

Blood urea-46.6 mg%.Serum creatinine-1.3 mg%

Urine Albumin (Traces).BP-110/70 mm/Hg

#### **ULTRASOUND AFTER TREATMENT**

No structural abnormality was seen in kidney. Liver normal in size and echotexture.

Ascites absent.Bilateral pleural effusion absent

Child battling between life and death was pulled out from very jaws of death
